UNIVERSITY OF MINNESOTA

QUALITY AND DEVELOPMENT UNIT

CONTENTS

Quality and development unit team

MR. MARWAN AL-AWAISHEH

ASSISTANT

DR. FATIMA AL-WAHSH

MANAGER

The Islamic University – the main center in the state of Minnesota – America seeks to develop and apply the principles of quality and to develop and improve the efficiency of the teaching staff and workers at the university and to ensure the quality of the university's academic program outcomes. Therefore, the university is keen to provide scientific and administrative competencies and provide a learning environment and graduate competencies capable of innovation, creativity and regional and global competition.

VISION AND MISSION

VISION

The mental vision of the future state of the educational institution determines the position it seeks to occupy in the educational process, whether in the local or global community or in relation to other similar institutions, and also determines its future plans. The Islamic University must be distinguished and creative in academic and administrative quality practices in accordance with international standards, including: It provides an outstanding education.

MISSION

A university aims to carry out missions and must precisely define its distinctive characteristics, indicating its role in meeting the needs of the community it serves, the characteristics of the student it accepts, the characteristics of the graduate it prepares, and the provision of appropriate education and training. An educational environment for both students, faculty and staff within quality standards and international standards.

DESCRIPTIVE STATISTICAL ANALYSIS BY SPSS

Mr. Marwan Abdullah Al-Awaisheh

Mr. Marwan talked about the importance of researchers and graduate students' knowledge of the statistical analysis program SPSS. He also explained the mechanism for dealing with data, how to code and process it, methods for defining variables, and conducting descriptive analysis by finding relative frequencies and measures of central tendency and representing the data graphically.
