

College of Computer Science and Information Technology Achievements – December 2025

December 2025 witnessed intensive activity across various academic and administrative aspects within the college. A range of initiatives and procedures were implemented to enhance the quality of education, improve services provided to students and faculty members, and ensure the efficient operation of the educational process. The following is a detailed overview of the most prominent achievements :

First: Uploading Educational Materials and Academic Assignments

The college completed the process of uploading all academic assignments and course materials to the online portal, including lectures, presentations, exercises, and supplementary resources. This enabled students to access academic content anytime and anywhere, enhancing their ability to organize their self-study and facilitating course registration and tracking of academic requirements

Second: Conducting Midterm and Semester Exams

All midterm and semester exams were uploaded to the online platform and conducted on their scheduled dates in accordance with the approved academic regulations. The college ensured a well-organized testing environment by coordinating with academic and technical departments, ensuring the readiness of electronic systems, and providing immediate technical support when needed. Supplementary exams were also administered to eligible students, with all necessary resources available to ensure their smooth and uninterrupted administration

Third: Organizing Remedial and Additional Lectures

In its commitment to addressing learning gaps and ensuring the completion of course content, the college organized remedial and additional lectures according to the approved schedules. Faculty and student attendance was monitored, and the quality of the material was ensured to guarantee the achievement of the course objectives

Fourth: Monitoring the Quality of the Educational Process

The college continued its efforts to monitor the quality of education by observing faculty performance during lectures and evaluating their adherence to the curriculum and approved content. Academic support was also provided to students who encountered difficulties, through academic advising and coordination with lecturers to provide necessary clarifications. These steps contributed to enhancing the learning experience and fostering student satisfaction

Fifth: Academic Meetings and Interdepartmental Coordination

Regular meetings were held for the heads of academic departments to review workflow, discuss challenges facing the educational process, and follow up on the implementation of previous decisions. Departmental councils were also activated, and their recommendations, aimed at improving the quality of education and enhancing academic performance, were monitored

Sixth: Training Courses and Workshops

In cooperation with the Development and Quality Unit, the college organized several training courses and workshops for faculty members and students. These programs focused on developing scientific and technical skills, promoting the use of e-learning tools, and improving classroom performance. This investment in training reflects the college's commitment to continuous professional development

Seventh: Student Services and Academic Communication

The college ensured that students' academic and administrative inquiries were addressed through official channels, including email and approved online platforms. Timely support was provided, including to graduate students, to facilitate their educational experience and provide a supportive and stimulating environment

Eighth: Strengthening the Academic Staff

As part of the college's efforts to attract academic talent, Professor Rand Ibrahim Hussein Al-Suhaimat was appointed as a lecturer in the Department of Networks and Cybersecurity in December. Her joining the department is expected to contribute to supporting biotechnology specializations and enhancing the quality of education and scientific research within the department

Conclusion

These achievements reflect the significant efforts made by all members of the college and their commitment to providing a distinguished educational experience and developing a comprehensive academic environment. The college affirms its continued commitment to improving performance and meeting the aspirations of its students and faculty members, in line with the demands of the digital age and academic transformation
