Achievements of the College of Computer Science and Information Technology – Beginning of the Second Semester (November 2025)

With the start of the second semester of the 2025 academic year, the college ensured a comprehensive educational and administrative environment that guarantees the smooth operation of the academic process from day one, reflecting Its commitment to quality performance and institutional excellence. :The most prominent achievements include

Class schedules for all academic levels were prepared and published on time, facilitating the organization of student and faculty schedules and enabling the scheduling of make-up and supplementary lectures according to a clear .timetable

Lectures commenced with regular attendance from all parties, reflecting the .effectiveness of the pre-planning

All course syllabi and educational materials, including self-study and remedial courses, were uploaded to the official online groups, providing .students with quick access to academic content

Tuition fees were also uploaded, along with their associated instructions .and guidelines, to clarify requirements and facilitate task completion

The process of adding new students and transferring some from the self-study system to the regular system was completed according to the new registrations, reflecting the college's flexibility In meeting student needs. – Exams were prepared, and the readiness of electronic systems and platforms was ensured, guaranteeing the availability of all necessary materials for .smooth examinations

Practical instructions and guidelines for exams and lectures were published for all students and faculty members to ensure clarity of roles and avoid any .confusion that might affect the educational process

Efforts were coordinated between the technical and administrative departments to provide a stable learning environment. This included setting up virtual classrooms, providing technical support, and activating the media .center's role in disseminating updates

As part of strengthening the academic staff, the following joined the college during October:

Dr. Mawaheb Kamal Al-Hajj Yahya Al-Sayed, Assistant Professor in the Department of Information Systems

Dr. Emad Ahmed Abdullah Shaheen, Assistant Professor in the Department of Networks and Cybersecurity

These achievements are clear indicators of the college's readiness and full preparedness for a successful semester, reflecting its commitment to providing quality education and a stimulating academic environment that supports excellence and continuous development
