Achievements of the College of Computer Science and Information Technology – January 2026

January 2026 witnessed an intensive period of organized academic and administrative work. The college operated according to a clear operational plan focused on fulfilling semester requirements, enhancing the quality of the educational process, supporting academic expansion, and optimizing institutional performance to achieve academic stability and raise the level of Internal efficiency.

First: Academic Expansion and Strengthening the Faculty

As part of the college's strategic plan to support academic expansion and raise the quality of education, (17) faculty members of various academic ranks were recruited and accepted during January 2026. These included:

Assistant Professors

Associate Professors

Lecturers

Across all departments of the college:

Department of Computer Science

Department of Networks and Cybersecurity

Department of Information Systems

Department of Data Science and Artificial Intelligence

All necessary procedures were completed, their appointments were officially approved, they were welcomed institutionally, integrated into the academic and administrative systems, and added to official groups to ensure rapid integration and effective communication.

Impact of this achievement:

Strengthening teaching capacity in various departments.

Supporting the stability of academic schedules and reducing academic pressure.

Distributing teaching loads efficiently and equitably.

Strengthening specialized disciplines in the fields of computing, networks, cybersecurity, information systems, and artificial intelligence.

Raising the level of academic quality and improving learning outcomes.

Second: Managing Examinations and Control Operations with High Accuracy

Uploading all final, supplementary, and project exams to the control office according to the approved timeframe.

Meticulously monitoring the recording of grades for all faculty members without exception.

Auditing and reviewing grades for assignments, projects, and written and practical exams.

Addressing feedback and grievances immediately to ensure fairness and transparency.

Ensuring the integrity of procedures and the accuracy of results before official approval.

Documenting all academic processes in official records.

Third: Organizing and Completing the Educational Process

Organizing and conducting make-up and supplementary lectures to ensure the complete completion of the course content.

Monitoring faculty attendance and adherence to the curriculum plan

Ensuring that the learning outcomes for each course are achieved.

Completing course registration processes smoothly and with high efficiency. Ensuring the absence of any academic or administrative obstacles that might affect the course of study.

Fourth: Developing Academic Performance and Building Capacities

Conducting a number of training courses and workshops for faculty members to enhance their teaching skills and use of modern technologies.

Providing scientific workshops for students to support their technical and practical skills.

Fostering a stimulating learning environment within classrooms.

Improving internal academic performance and raising the level of discipline and professionalism.

Fifth: Enhancing Institutional Communication and Quality Assurance

Improving communication mechanisms between academic departments and the academic administration.

Following up on students' academic and administrative inquiries through official channels and approved groups.

Analyzing and addressing technical and organizational issues directly and promptly.

Submitting periodic follow-up reports to ensure continuous improvement.

Enhancing integration between departments to ensure the smooth flow of academic work

Sixth: Supporting Students and Academic Stability

.Providing academic and advising support to students during the examination period

.Simplifying administrative procedures and reducing response times to requests

Continuous monitoring to ensure student satisfaction and academic stability. Working to create a stable and
...organized learning environment

General Summary

January 2025 reflected an advanced level of planning, organization, and institutional integration within the
college. This was achieved through qualitative academic expansion, meticulous control of examination
processes, enhanced educational quality, and improved academic performance, all of whichh support the
.college's vision of excellence and sustainability in the educational process
