

## Achievements of the College of Computer Science and Information Technology during February 2026 :

Completed monitoring of the final and supplementary exams for the second semester and ensured their smooth implementation according to the approved plan

Monitored the work of the examination control office and maintained ongoing coordination regarding grades and courses that rely on projects and practical assessments until their requirements are met

Conducted daily follow-up with all college groups and academic departments, responding to .inquiries from students and faculty members and addressing any feedback received

Published reminders regarding exams, their dates, scheduled courses, and the names of faculty members through the approved channels

Maintained continuous communication and follow-up with the Dean of the College, department heads, and the College Secretary to ensure the efficient operation of academic and administrative processes

Followed up on the work of the Timetable Committee and coordinated with them regarding academic assignments and requirements for the upcoming semester

Commenced the preparation and finalization of course schedules for the summer semester, coordinated academic dates, and completed the procedures for selecting faculty members for courses

Followed up on the procedures for renewing faculty appointments and coordinated with the relevant authorities

Published and distributed academic calendars, announcements, and circulars to students and faculty members. Participating in the organization, preparation, and announcement of seminar sessions for graduate students and coordinating with the scientific committees

#### Seminar Sessions and Research Plans:

Organizing and announcing the research plan discussion session for researcher Rana Nassif, titled: AI-Powered Skin Cancer Detection Using Deep Learning Models

Organizing and announcing the research plan discussion session for researcher Ahmed Abdelkareem Mokhtar, titled: Analyzing Customer Sentiment Using Natural Language Processing (NLP) on Ratings and Reviews

Organizing and announcing the research plan discussion session for researcher Mohammed Ali Zein El-Din, titled: The Effectiveness of Employing Interactive Tools Supported by Machine Learning Algorithms in Improving Students' Oral Reading Skills

Supporting graduate studies activities and contributing to enhancing research and academic activity by following up on and organizing seminar sessions and research plan discussions

Completing academic and administrative tasks related to the second semester and monitoring the implementation of daily tasks to ensure the continuity of work and the achievement of the college's goals
